Welcome to New Hampshire Hand Therapy Center. We look forward to working with you at our clinic. Please fill out the forms provided so that we may get to know you better as we service your needs and help you manage your symptoms. If you are a Medicare patient (or if you have an extensive medication list), please provide us with a list of your medicines, dose and frequency of use. We look forward to meeting you and we would like to encourage you to have all your questions and concerns prepared for your initial evaluation.

The therapists here at NHHTC communicate closely with our referral sources and physicians by sending thorough initial evaluations and regular progress notes. We work under the direction of the referring medical provider. Our goal is to return the client to their maximum level of function in the most time efficient and cost effective manner.

New Hampshire Hand Therapy Center has been in service for 21 years and is an upper quadrant specialty practice, located in Bedford, NH. We have the largest number of Certified Hand Therapists on staff in NH and are comprised of Physical and Occupational Therapists. Each therapist has 16 years or greater specializing in all aspects of treatment, including wound care, soft tissue mobilization, custom splinting and shoulder/cervical diagnoses. We treat all types of upper extremity injuries, such as but not limited to brachial plexus injuries, compression syndromes, fractures, arthritis and post surgical nerve/tendon repairs. Treatment often includes fabrication of custom splints to protect or prevent complications. We service the pediatric, adult and geriatric population.

Sincerely,

The Staff at

NH Hand Therapy Center, Inc.
